or by appointment

Phone: 744-1806**Syllabus Attachment.** OSU has compiled useful information that applies to all classes at<http://academicaffairs.okstate.edu/faculty-a-staff/46-syllabus-attachment>

This website includes add/drop/withdrawal dates, university holidays, accommodations for students with disabilities, academic resources, and much more. You are responsible for reading this information and having any questions answered. A copy of the syllabus attachment is part of this document.

This study of College Algebra involves the use of technology – the use of the graphing calculator has been integrated into the delivery throughout. Online methods are also used. Technology can be a tremendous aid in learning mathematics only if it is used *appropriately*. Technology is not a "quick fix" to learning functions or any mathematics! Because of the importance of technology today, a goal of the course is that you are comfortable with it and that you know when it is *appropriate* to choose it in learning mathematics. I think you will find technology is a great asset in learning mathematics.

Course Prerequisites. A minimum score of 30 on the ALEKS assessment. Some minimal familiarity with a graphing calculator such as the Texas Instruments TI-83 or TI-83Plus is also required.

Course Objectives. To learn college-level algebra and to complete the college mathematics requirements for further study of mathematics and of mathematically-dependent subjects.

Required Textbook Package and Supplies.

- ***MyMathLab Access or Textbook Package.*** You are required to purchase a bundle that includes MyMathLab access, a custom textbook, and a graphing calculator manual. The text is *College Algebra: Graphs and Models (Second Custom Edition for Oklahoma State University)* by M. Bittinger, J. Beecher, D. Ellenbogen, and J. Penna, Pearson Learning Solutions, 2012. Note: If you do not register for MyMathLab immediately, you will not be able to complete required homework. You are responsible for registering in time to meet all course deadlines.
- ***Graphing Calculator.*** You are required to have a graphing calculator for this course. I will be using a TI-83 Plus graphing calculator for some class demonstrations. You may check out a TI-83/TI-83 Plus graphing calculator from the Mathematics Department (401 MS) for use during the semester while the supply lasts; there is NO charge.

Course Evaluation. There will be a total of 1000 points possible in this course, distributed among homework, quizzes, attendance, MLSC participation, hourly exams, and the final exam as shown below. Course grades will be determined according to the following distribution.

Homework	200 points	Letter grades will be assigned according to the following scale.	
Homework Worksheets	50 points		
Quizzes	100 points		
Attendance	40 points		
MLSC Participation	60 points		
Examination 1	100 points	900-1000 points	A
Examination 2	100 points	800-899 points	B
Examination 3	100 points	700-799 points	C
Final Examination	250 points	600-699 points	D
-----		0-599 points	F

TOTAL 1000 points

Examinations. There will be three (3) fifty-minute examinations with a maximum possible score of 100 points each and a 250 point comprehensive final examination. *Make-up midterm examinations* will be given only for **documented, valid and unavoidable** conflicts, and your request to present a make-up examination is made **in advance** for known conflicts or in a timely manner when extenuating circumstances arise. If this condition is not satisfied, it is understood that the opportunity to present a make-up examination is voided. In the instance that a make-up examination is appropriate, your make-up examination score will be equal to your percentage score on the final examination. In general, make-up final examinations are not given and more than one make-up examination is not permitted. Bring your student ID to each examination.

Exam Dates. Our exams will be held on the following dates; mark your calendar NOW!

Exam 1: Friday February 8 over 1.1-1.6 & 2.1-2.6

Exam 2: Wednesday March 6 over 3.1- 3.5 & 4.1-4.5

Exam 3: Wednesday April 10 over 5.1-5.6 & 6.1-6.4 & 7.4

Final Exam: Tuesday April 30 12:00noon-1:50pm AGH 101

Homework Grade. Homework will be completed primarily online using the MyMathLab (MML) program. The total number of points possible on homework assignments may exceed 200 points; however, your homework grade will not exceed 200 points. Late work will not be accepted.

Homework Worksheets. Each week you will complete a homework worksheet. All work must be shown. The total number of points possible on homework worksheets may exceed 50 points, however, your homework worksheet grade will not exceed 50 points. Late work will not be accepted.

Quizzes. There will be announced and unannounced quizzes during the semester. The total number of points possible on quizzes may exceed 100 points; however, your quiz grade will not exceed 100 points. Quizzes may not be made up.

Attendance/Class Participation Score. Daily attendance is critically important. It is difficult, and sometimes impossible, to succeed in a college course without regular attendance. At least once per day, I will take attendance in some way. For each day you are present in class for the entire class session and actively participating you will receive 1 attendance point. The total number of attendance points possible for the semester is 44 points, however your score will be calculated based on 40 attendance points.

MLSC Participation. In addition to participating in class daily, you will also earn points by using the free resources at the Mathematics Learning Success Center (MLSC). Each week you will spend a minimum of 1 hour at the MLSC to earn MLSC participation points. Four (4) points will be earned each week beginning the week of January 7 and ending the Friday (April 26) of pre-finals week. (The MLSC may be open during Finals Week, but participation points will not be earned.) **To ensure that your points are recorded each time that you go to the MLSC, make sure that you check in with your OSU Student ID and identify yourself as a College Algebra student.** I also encourage you to keep a log of the dates and times that you visited for your own reference. MLSC Participation Points will not be recorded if you check into the MLSC during the time your class meets.

The first time you go to the MLSC:

- Bring your O-Key Account Username (log in at okey.okstate.edu to find it) and your OSU Student ID Card to the MLSC check-in (420 CLB).
- Be sure you know the COURSE AND SECTION in which you are enrolled.

Every time you go to the MLSC: Check in with your OSU Student ID Card.

A schedule of the times when the MLSC is open this semester will be distributed in class.

MLSC: Mathematics Learning Success Center - The MLSC is an invaluable resource to support your mathematical learning. The MLSC is located on the 4th floor of the Classroom Building (Check in at CLB 420). For more information, visit the MLSC website at www.math.okstate.edu/mlrc, or call 405-744-5818 or 405-744-5688.

More on Class Attendance. Class attendance involving active participation is a very important element in your success in learning College Algebra. **YOU ARE EXPECTED TO ACTIVELY PARTICIPATE IN EACH CLASS SESSION.** Experience has shown a definite correlation between good class attendance and good grades. Signing the class Attendance Sheet for another student is not permitted; if it is determined that a student signed in for another student, this unethical conduct will be regarded as a violation of Academic Integrity and the appropriate University policies will be employed. Of course, you won't get anything out of the class if you are there physically but not mentally or if you are unprepared. Simply showing up to class is not enough.

Because of the value I place on our class sessions as active learning opportunities, I ask that you assume responsibility for being physically present no later than **10:30am**. If you do miss a class session, you are responsible for finding out what you missed from a classmate, including any announcements and notes from class discussions. I also realize that you may have a class that follows this one; I will dismiss each class session promptly at **11:20am**.

Drop and Withdrawal Policy (General University Policy 2-0206). "Dropping" means withdrawing from a specific course while "withdrawal" means withdrawing *from all courses* and leaving the University for the balance of the term. The drop and withdrawal dates are noted on the syllabus attachment. **IT IS YOUR RESPONSIBILITY TO KNOW AND COMPLY WITH ALL DEADLINES.** Reasons similar to those listed below will NOT result in approval for dropping a course after the deadline (from OSU Policy 4.03):

- a. Student's lack of knowledge or misunderstanding of the deadline.
- b. Student waited to get the results of an exam or other assignment.
- c. Student's grades have declined since the deadline.
- d. Student doesn't need the course for graduation.
- e. Different deadlines existed at a previous school.

Incomplete Grade. The grade of "I" is given to students who satisfactorily complete the majority of the course work and whose work averages "D" or better, but who have been **unavoidably** prevented from completing the remaining work of the course. A condition that the students must repeat the course in order to remove the "I" is not permitted. The maximum time allowed for a student to remove an "I" is one calendar year.

Academic Integrity. The university has explicit rules governing academic integrity. Please consult the OSU Fall 2012 Syllabus Attachment mentioned above.

Working with another person or in study groups on problems can be helpful in learning the material. I encourage you to work together if you find it helpful. However, **all written and on line work submitted must be your own.** Copying someone else's problem solution, showing your written solution to someone else, or having another person complete your on line work is prohibited; such behaviors are regarded as violations of academic integrity and will be treated according to the University's policy. In order to be successful in learning the material and doing well on the examinations you must think very hard about the problems themselves **before** discussing them with anyone else.

Special Accommodations for Students. "If you think you have a qualified disability and need special accommodations, you should notify the instructor and request verification of eligibility for accommodations from the Office of Student Disability Services. Please advise the instructor of your disability as soon as possible, and contact Student Disability Services, to ensure timely implementation of appropriate accommodations. Faculty have an obligation to respond when they receive official notice of a disability but are under no obligation to provide retroactive accommodations. To receive services,

you must submit appropriate documentation and complete an intake process during which the existence of a qualified disability is verified and reasonable accommodations are identified. Call 405-744-7116 or go to <http://sds.okstate.edu/>." (OSU Spring 2013 Syllabus Attachment)

Office Hours. I encourage you to come talk to me during my office hours (or email for an appointment if you can't make any of those times) when you have questions or concerns. When you come to my office hours or to the MLSC, you should come prepared with specific questions. You should have already reviewed your lecture notes, read through and taken notes on the relevant portions of the textbook, and attempted some problems. Be prepared to tell me or the tutor where you are stuck or what concepts are still confusing to you, and we will be happy to help.

Final Note. Any changes in this syllabus will be communicated to you by the instructor in class or on our course website.
