

Instructor: Nicki Gaswick

Office: MSCS 431

Phone: 405-744-8412

Email: ngaswick@math.okstate.edu (preferred method of contact)

Office Hours: MWF 9:30-11:00AM, TR 2:00-3:00PM. If you have a conflict with these times, please make an appointment (after class, or by email) to see me at another time.

Text: Technical Calculus with Analytical Geometry by Peter Kuhfittig 4th Edition

Course: This is the second semester of a two-semester sequence in calculus for students in the School of Technology. We will extend the concepts of elementary calculus (primarily differentiation and integration) to trigonometric, inverse trigonometric, exponential and logarithmic functions.

Prerequisite(s): MATH 1715 or 1513 and 1613 and 2123.

Course Structure: This is a lecture-based class that meets three days a week. There will be thirteen quizzes, three exams and a final exam in the class. To succeed in this class you should take responsibility for your own success by working and understanding all the homework assigned, attending lectures and use the course resources such as the MLRC. I encourage you to ask me when you have questions or concerns and I will be happy to help. I care about your general welfare as a student and am committed to your success in my class this semester.

Cell Phones: Cell phones and all other electronic devices (excluding calculators) must be turned off and be out of view during the entire class. Cell phones and electronic devices may not be used during class to play games, text, listen to music, making or receiving phone calls, using cell phones as a calculator, etc.

Calculators: A scientific or graphing calculator may be used to complete homework for this class. This calculator must be a dedicated calculator, not a cell phone or iPod or something similar. The use of the calculator may not be allowed on certain exams or quizzes.

Homework: Select problems from each section have been selected to provide a foundation of each topic covered in class. These problems should be worked in detail and will be the basis for many of the quizzes and exam topics; however, this homework will not be collected for a grade.

Quizzes: There will be thirteen quizzes throughout the semester. These may consist of in-class, take-home, or group quizzes. Each will be worth 20 points. The two lowest scores will be dropped. The quiz score, Q , will be your percentage score of the highest 10 quizzes, i.e.

$$Q = \frac{Q_1 + \dots + Q_{10}}{2}.$$

Exams: There will be three exams throughout the semester plus a final exam. The three exams will be given on **September 17th**, **October 22nd**, and on **November 19th**. Each exam will be worth 100 points. Your exam score will be the total sum of scores of exams 1, 2, and 3 divided by 3, i.e. $E = \frac{E_1 + E_2 + E_3}{3}$.

Final Exam: The final exam will be comprehensive and will be worth 100 points. The final exam will be given on **Wednesday, December 12th** from **10:00-11:50AM** in 331 HSCI (our regular class meeting room). This time for the Final exam is not negotiable (except when the OSU Final Exam Overload Policy applies). You should note this on your calendar now; Plan ahead.

Final Grades: The final grade will be based upon your semester score (consisting of the three exams and all the quizzes) and final exam. The semester score will be $S = \frac{3}{5}E + \frac{2}{5}Q$. The score of the final exam will be denoted F . Then the final grade for the course will be based on the number

$$G = \max\left(\frac{S + F}{2}, \frac{3S + F}{4}\right)$$

The total score of at least 90% will ensure an 'A', a score of at least 80% will ensure at least a 'B', a score of at least 70% will ensure at least a 'C', and a score of at least 60% will ensure at least a 'D'.

Missed Work: The Mathematics Department suggests a policy on missed work, which I shall be following in this class. Here it is in full:

(A) Every student shall be offered reasonable accommodation in the event that he or she misses a major assessment activity for a valid and documented reason.

(B) Appropriate documentation shall be provided by the student in a timely fashion to support his or her request for accommodation.

(C) Major assessment activities are those such that a zero on that activity could reasonably be foreseen to impact the student's grade substantially; this category includes, but is not limited to, exams.

(D) Valid reasons include official University activities, activities associated with military service, illness, family emergencies, mandatory court appearances, and any other events of comparable gravity.

(E) Reasonable accommodation means that the student will be given the opportunity to earn a grade on the assessment activity that is based on criteria as similar as possible to those used to grade his or her classmates. This opportunity should normally be made available in a timely fashion.

What all this means is that if you have to miss a quiz or exam for a *serious* reason, *and you are able to provide acceptable documentation verifying that reason*, then you will be allowed to make up the missed work. If you have a scheduled University activity (like a field trip or sporting event) then it is normally best to do this beforehand. I try to be flexible and fair, so if you encounter an unusual circumstance then it is worth at least asking about make-up work, although I might say no.

Data Sheet & Course Contract: At the beginning of the semester you will be asked to complete a Data Sheet with picture ID and sign a Course Contract. This document is a very important requirement of the course. You should make it a high priority to complete it properly and return it to the instructor on time. No quiz or exam scores will be recorded for you until you turn in the document. Copies of the document will be passed out during the first lecture.

MLRC: The Mathematics Learning Resource Center is located on the 4th floor of the Classroom Building just north of the Student Union in room 420 CLB. The MLRC is a place where students can receive tutoring and review topics in undergraduate math classes. To find the hours of operation please visit <http://www.math.okstate.edu/mlrc>.

D2L: I use D2L to post information about the class. If I need to contact the class I will use the email system through D2L. This means you need to check your OSU email regularly.

Important Dates:

Monday, August 20: Classes Begin

Monday, August 27: Last day to drop/add a class with no grade and no fees

Friday, August 31: Last day to drop a course with 50% fees and grade of "W"

Monday, September 3: University Holiday (Labor Day)

Friday, October 5: Fall Break

Friday, November 9: Last day to drop this class with a grade of "W"

Wed-Fri. November 21-23: Thanksgiving Break

Friday, November 30: Last day to withdraw from ALL classes with a grade of "W/F"

Pre-Finals Week: December 3-7

Finals Week: December 10-14

University Policies / Academic Integrity: OSU is concerned about your success as a student here and has provided a website to answer questions most often asked by students. If you have questions regarding OSU policies, please visit:
<http://academicaffairs.okstate.edu/current-students/47-syllabus-fall>.

OSU is committed to the maintenance of the highest standards of integrity and ethical conduct. OSU's academic integrity policies will be followed in this class and these policies can be viewed online at <http://academicintegrity.okstate.edu/>

Doing Your Own Work: On homework and take-home quizzes you are encouraged to work with others and with tutors, but you should ultimately be able to work the problems and understand the concepts yourself. Copying is not allowed! You need to complete your own write up of problems even if you receive help. You must credit those of whom you received help from on take-home quizzes.

Special Accommodations for Students: "If you think you have a qualified disability and need classroom accommodations, contact the office of Student Disability Services, currently located in 015 University Health Services (during Student Union renovation). Please advise the instructor of your disability as soon as possible, to ensure timely implementation of appropriate accommodations. Faculty have an obligation to respond when they receive official notice of a disability from SDS but are under no obligation to provide retroactive accommodations. To receive services, you must submit appropriate documentation and complete an intake process during which the existence of a qualified disability is verified and reasonable accommodations are identified." (OSU Spring 2012 Syllabus Attachment)

Any changes in this syllabus or class schedule will be communicated to you in class by the instructor.

Wk	#	Date	Section-Topic	Wk	#	Date	Section-Topic
			Course Introduction				
1	1	20-Aug	Review of Concepts	11	29	29-Oct	7.7 Integration by Parts
	2	22-Aug	6.1 Review of Trigonometry		30	31-Oct	7.7 continued
	3	24-Aug	6.1 continued		31	2-Nov	9.1 Surfaces in 3 Dimensions
2	4	27-Aug	6.2 Derivatives of Sine & Cosine	12	32	5-Nov	9.2 Partial Derivatives
	5	29-Aug	6.2 continued		33	7-Nov	9.2 continued
	6	31-Aug	6.3 Other Trig Functions		34	**9-Nov	9.5 Iterated Integrals
3		3-Sep	NO CLASS-Labor Day	13	35	12-Nov	9.6 Volumes by Double Integration
	7	5-Sep	6.3 continued		36	14-Nov	9.7 Mass and Centroids
	8	7-Sep	6.4 Inverse Trig Functions		37	16-Nov	Catch up and Review for Exam 3
4	9	10-Sep	6.5 Deriv. of Inverse Trig Functions	14	38	19-Nov	Exam 3 (7.6-7.7, 9.1-9.2, 9.5-9.7)
	10	12-Sep	6.5 continued			21-Nov	NO CLASS-Thanksgiving Break
	11	14-Sep	Catch up and Review for Exam 1			23-Nov	NO CLASS-Thanksgiving Break
5	12	17-Sep	Exam 1 (6.1-6.5)	15	39	26-Nov	8.1 Vectors & Parametric Equations
	13	19-Sep	6.6 Exponential and Log Functions		40	28-Nov	8.2 Arc Length
	14	21-Sep	6.6 continued		41	30-Nov	8.3 Polar Coordinates
			6.7 Derivative of Log Functions				
6	15	24-Sep	6.8 Derivative of Exp Functions	16	42	3-Dec	8.4 Curves in Polar Coordinates
	16	26-Sep	6.7 & 6.8 continued		43	5-Dec	8.5 Areas in Polar Coordinates
	17	28-Sep	6.9 L'Hospital's Rule		44	7-Dec	Review for Final Exam
7	18	1-Oct	7.1 The Power Rule Again				FINAL EXAM
	19	3-Oct	7.2 The Exponential and Log Forms				Wednesday December 12th
		5-Oct	NO CLASS-Fall Break				10:00-11:50 AM
8	20	8-Oct	7.2 continued				The final exam is held in our
	21	10-Oct	7.3 Trigonometric Forms				regular classroom
	22	12-Oct	7.3 Continued				
							The final exam time and date is set
9	23	15-Oct	7.4 Further Trig Forms				by the University and cannot be
	24	17-Oct	7.5 Inverse Trig Forms				changed
	25	19-Oct	Catch-up and Review for Exam 2				
10	26	22-Oct	Exam 2 (6.6-6.9, 7.1-7.5)	***	**	9-Nov	Last day to drop class with "W"
	27	24-Oct	7.6 Integration by Trig Substitution				
	28	26-Oct	7.6 continued
